

FOR USE ONLY WITHIN THE STATE OF FLORIDA

RESTRICTED USE PESTICIDE

Due to toxicity to aquatic invertebrate animals.
For retail sale to and use only by Certified Applicators, or persons under their direct supervision, and only for those uses covered by the Certified Applicator's certification.

Dimilin® 25W

INSECT GROWTH REGULATOR

EPA REG. NO. 400-465

Active Ingredients: (% by weight)

N-[[[4-Chlorophenyl]amino]carbonyl]-2,6-difluorobenzamide25.0%

Inert Ingredients75.0%

KEEP OUT OF REACH OF CHILDREN CAUTION

THIS LABEL IS SUPPLEMENTAL TO THE STANDARD FEDERAL LABEL PRINTED ON THE CONTAINER

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product through any type of irrigation system.

CROP/SITE: For use only in the following aquatic sites where there is low risk to populations of crabs, shrimp and other non-target arthropods through direct application, runoff or drift.

Street gutters, rubber tires stockpiled for processing or frost protection; storm water drains, ditches and retention/detention/seepage ponds; sewage effluent and disposal spray fields and oxidation ponds; grassy swales; phosphate pits, tailing canals and slime ponds; wastewater biological filter beds; industrial waste tertiary ponds and irrigation disposal fields; livestock, swine and poultry waste lagoons; man made ponds, channels and percolation basins developed exclusively for decorative and landscape purposes, intermittently flooded pastures.

Do not apply when conditions favor drift or runoff to adjacent aquatic sites.

TARGET PEST: Mosquitoes

DOSAGE/APPLICATION:

Sites Other Than Intermittently Flooded Pastures: Apply 3.25 oz. of DIMILIN 25W (0.05 lbs. a.i.) per acre in sufficient spray mixture to provide uniform coverage. If granular formulation is used, refer to the table below. Repeat at 10 day intervals to maintain control. Application may be made by either ground or aerial application equipment.

Intermittently Flooded Pastures: Apply only the granular formulation to intermittently flooded pastures and low areas within the pastures that hold water (standing water) not to exceed twenty-one (21) days. Use the rates indicated in the table below and apply by either ground or aerial application equipment. Do not make more than 6 applications per year, and do not use where treatment will result in exposure to non-target organisms.

For use by mosquito control agencies to control mosquito larvae, a 0.25 or a 0.5% granule may be prepared and applied according to the following directions:

	0.25% Granule	0.50% Granule
DIMILIN 25W Insect Growth Regulator	30 lbs.	60 lbs.
Coarse Sand (20/30 mesh)	2957 lbs.	2927 lbs.
Oil	10 lbs.	10 lbs.
Hysil 233	3 lbs.	3 lbs.
Total:	3000 lbs.	3000 lbs.
Rate of Use - Pastures	10 - 16 lbs./A	5 - 8 lbs./A
- Other Sites	20 lbs./A	10 lbs./A

Thoroughly mix sand and oil for 10 minutes. Add DIMILIN and Hysil and mix an additional 30 minutes. A typical batch should take 30 minutes to mix and 30 minutes to empty. Use granules promptly after mixing.

Application may be made by either ground or aerial application equipment. It is essential that application be uniform over the treated area. When inspections indicate an increase in the density of larvae, repeat applications at a minimum of 10 day intervals. A maximum number of six (6) applications may be made per year.

Treated water may not be used for irrigation or human consumption.

Do not plant food or feed crops in treated pasture areas within 6 months following the last application, unless DIMILIN 25W is authorized for use on these crops.

This pesticide is toxic to aquatic invertebrates. Fish and aquatic invertebrates may be killed where this pesticide is used. Do not contaminate water when disposing of equipment wastewater or rinsate. Consult with State agency in charge of fish and game before applying to public waters to determine if a permit is required.

Do not use in potable water or in water used for swimming.

Follow all applicable directions, restrictions, and precautions on the EPA registered label.

This label must be in the possession of the user at the time of the pesticide application.
