FIFRA 2(ee) Recommendation

For Distribution and Use in the State of California

This recommendation is permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

All applicable directions, restrictions, and precautions on the EPA registered label are to be followed.

CROP	PEST	RATE OF APPLICATION
Almonds	Anthracnose (<i>Colletotrichum acutatum</i>)	4 pints (Equus 720 SST) 3.6 lbs. (Equus DF)

APPLICATION RECOMMENDATIONS

For control of Anthracnose: In orchards that have a history of anthracnose, apply Equus Fungicide beginning at 5-10% bloom or pink bud and repeat every 10 to 14 days if rains persist. Late spring rains may necessitate additional applications into May. Apply in a minimum of 20 gallons per acre concentrate to 300 gallons per acre dilute. If application with ground equipment is not feasible, Equus fungicides may be applied by air in a minimum of 20 gallons of spray per acre.

RESTRICTIONS

- Do not exceed a maximum of 18.75 lbs active ingredient (25 pints 720 SST or 22.7 lbs WG) per acre per year.
- PHI (Pre-Harvest Interval) is 150 days.
- This product is a severe eye irritant. Although the restricted-entry interval expires after 12 hours, for the next 6.5 days, entry is permitted only when safety measures as outlined in the Agricultural Use Requirements on the container label are followed and appropriate eye protection is worn.
- To avoid the development of tolerant or resistant strains of fungi, Equus Fungicides should always be tank mixed with a fungicide of different chemistry, and/or a fungicide of different chemistry should be alternated with Equus at each application.
