CROP	PEST	RATE OZS./ACRE	COMMENTS
<b>TREE NUTS GROUP AND PISTACHIOS:</b> Including but not limited to: Almond, Beech Nut, Brazil Nut, Butternut, Cashew, Chestnut, Chinquapin, Filbert (Hazelnut), Hickory Nut, Pecan, Pistachios, and Walnut (black and English) ( <b>PHI = 28</b> )	European red mite, Twospotted spider mite, McDaniel spider mite, Strawberry spider mite, Pacific spider mite, Pecan leaf scorch mite, Willamette mite, Citrus Red Mite	12 - 24	For air applications, apply a minimum of 5 gallons finished spray per acre.
	<ul style="list-style-type: none"> <li>• Do not make more than one application per year.</li> </ul>		

**RESTRICTIONS ON ALL CROPS**

- Do not graze or feed livestock on cover crops growing in treated areas.
- Do not use water from treated fields for irrigating other crops.
- Do not apply this product through any type of irrigation system.
- Onager is an emulsifiable concentrate to be diluted with water for application in commercial plantings only.
- Apply Onager prior to adult mite build up. Onager will not control adult spider mites. Use higher rates on moderate to high mite infestations or for larger plants with a dense canopy. If adult mites are present in medium to high populations, better results may be obtained using Onager in combination with a registered contact adulticide. The use of less than label rates is not recommended with Onager.
- Do not make more than one application of Onager per year.
- Do not plant rotational crops other than those on this label within 120 days of this application.

Onager is a registered trademark of Nippon Soda Company, Ltd.

CA Supplemental: Onager Miticide for aerial application to tree nuts and pistachios
