

Supplemental Labeling

Dow AgroSciences LLC

9330 Zionsville Road

Indianapolis, IN 46268-1054 USA

Restricted Use Pesticide

Because pronamide has produced tumors in laboratory animals, this product is for retail sale to and use only by Certified Applicators or persons under their direct supervision, and only for those uses covered by the Certified Applicator's certification.

Kerb[®] SC

EPA Reg. No. 62719-578

For Grass and Weed Control in Head Lettuce - Aerial Application

(For Use in Arizona and California)

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read this supplemental labeling and the label affixed to the container for Kerb[®] SC herbicide before applying.
- All applicable use directions, precautions and restrictions on the product label for Kerb SC as well as this supplemental labeling must be followed.

Directions for Use

Notice: Before using this product, read the entire Precautionary Statements, Conditions of Sale and Warranty, Directions for Use, Use Restrictions, and Storage and Disposal Instructions. If the Conditions of Sale and Warranty are not accepted, return the product unopened within thirty days of purchase to the place of purchase. This product contains 3.3 lbs active ingredient pronamide per gallon.

Kerb[®] SC herbicide may be applied by aircraft for preemergence control of susceptible grasses and broadleaf weeds in head lettuce. Kerb SC must be applied at the dosage rate of 1.2 to 2.4 qts of product (1.0 to 2.0 pounds active ingredient) per treated acre depending on soil type (refer to comments under Dosage Chart on the EPA-registered label). Mix the specified amount of Kerb SC in 10 to 20 gallons of water per acre for aerial application. For aerial applications of Kerb SC on head lettuce, consult the label carefully for plantback information. Avoid drift to all other crops and non-target areas.
