DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered AAtrex® 4L label.

This labeling must be in the possession of the user at the time of pesticide application.

GENERAL INFORMATION

For control of several weeds in St. Augustinegrass lawns, including creeping charlie, cudweed, mare's tail, ragweed and spanishneedles.

For Professional Use Only:

Apply 43 ml of AAtrex 4L in 1-1.5 gals. of water per 1,000 sq. ft. of treated area. Application may be hand-carried sprayer or from truck-mounted sprayer with hose and nozzle attached. Application rate is 2.0 lbs. of active ingredient per acre of treatable area.

Precaution: St. Augustinegrass establishment may be delayed if application is made prior to or within 2 weeks following sprigging.

This product could cause serious injury or even death to some annual plants and woody ornamentals. Therefore, **DO NOT** apply in flower beds or closer than the drip-line of ornamentals (root zone). **DO NOT** apply during hot summer days.

Chemigation: **DO NOT** apply this product through any type of irrigation system.
