DIRECTIONS FOR USE

Crop	Disease	Rate fl. oz./Acre (lb ai/A)	Remarks
Hops	Downy mildew (<i>Pseudoperonospora humuli</i>)	8.0 (0.13)	<p>Begin applications prior to disease development and continue throughout the season on a 7-10 day interval. Make no more than 2 consecutive applications before switching to an effective non-Group 40 fungicide. For resistance management, no more than 50% of the sprays should be Revus. Use the shorter interval under high pressure or when conditions are conducive to disease. Revus may be tank mixed with another fungicide labeled for downy mildew that has a different mode of action.</p> <p>The addition of a spreading/penetrating type adjuvant such as a non-ionic based surfactant or blend is recommended.</p>
	Application: For best results, use sufficient water volume to provide thorough coverage. Revus may be applied by ground, chemigation, or aerial application.		

Specific Use Restrictions:

- Do not apply more than 24 fl oz of product/A/season (0.39 lb a.i./A/season).
- Do not apply within 7 days of harvest (7-day PHI).
