PRODUCTION

DIRECTIONS FOR USE

FOLIAR APPLICATIONS:

This material may be foliar applied with other fertilizers for best results. In a clean spray tank, add any dry powders and water and agitate. Add liquid fertilizers and this material last, continuing agitation. Always use enough water for uniform application and to prevent possible plant tissue damage to the intended crop from concentrated droplets. Contact your Source to Source representative for ultra-low volume rates. Apply during the cool part of the day, or when temperatures are below 85° F. Do not apply under windy conditions, or other conditions that promote fast drying of leaf surfaces. Do not store diluted material.

Foliar Spray Concentration Ratio:

Apply 1 gallon in 7.5 gallons of water or more.

COMPATIBILITY:

Shine[™] O.A. has a near neutral pH and is compatible with many insecticides, fungicides and chelated micronutrients. Shine[™] O.A. should be jar tested and/or field tested in a small area to observe potential phytotoxicity before application. Contact a Source to Source representative for a list of compatible mixes. User assumes full responsibility to ensure product, equipment and plant compatibilities. For best results, buffer all tank mixes to a final pH of 6.0-7.0. When tank mixing this product with pesticides requiring specific pH ranges, always follow pesticide label directions.

STORAGE AND DISPOSAL:

Store in a sealed container in cool, dry location, at temperatures above freezing. Triple rinse and dispose of containers according to local and federal regulations.

SUGGESTED RATES AND TIMINGS

FRUIT & NUT TREES & GRAPE VINES & OTHER VINES:

Apply .25 - 1 gallon of Shine[™] O.A. per acre, in combination with water and any compatible mineral that may be needed.

VEGETABLE CROPS, FIELD AND ROW CROPS:

Apply Shine[™] O.A. at 8 ounces to 1 gallon per acre, in combination with water and any compatible mineral that may be needed.

CAUTION: KEEP OUT OF REACH OF CHILDREN.

NOTICE: Seller warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. Buyer shall assume all risks of use including, but not limited to crop injury, ineffectiveness or other unintended consequences as may result because of such factors as weather conditions, presence of other materials or the manner of use or application, all of which are beyond the control of the seller. In no case shall Source to Source be liable for consequential, special or indirect damages resulting from the use or handling of this product.

Always refer to the label on the product before use.
